

Temperature Screening Enhanced by an Enterprise Platform

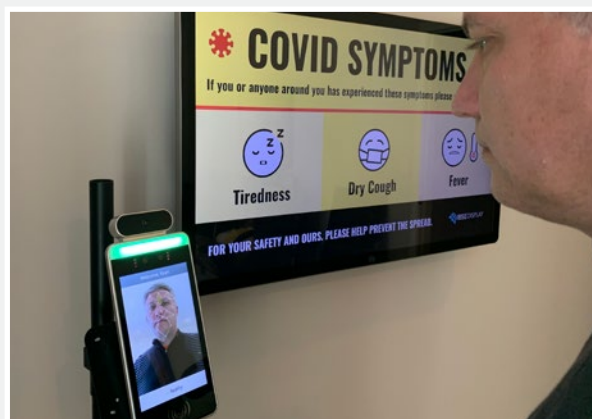

Is temperature screening worth the investment?

When uncertainty prevails, peace of mind is imperative. Therefore, every business must adopt 'reasonably expected' prevention methods for their places of business to protect both people and their assets. This is called 'duty of care', and it's squarely rooted in risk management.

Enterprise Temperature Screening

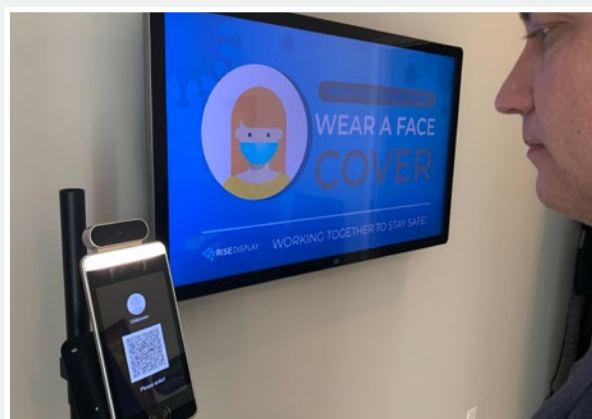

This helps businesses verify that anyone entering has no elevated temperature, offsetting the high cost, human risks and logging errors typical of manual checks across multiple venues. Configurable with multiple hardware and accessory options, enterprise-ready and available with a mobile app, it supports most any workflow or compliance requirements.

Actual core body temperatures should be further confirmed using clinical measurement devices. Under any circumstances, it is highly recommended to use thermographic cameras in accordance with local laws and regulations. Statements regarding temperature device have not been evaluated by the FDA and are not intended to diagnose, treat, cure or prevent any disease or health condition.

Facial Recognition

Use our mobile Safe Pass App and set up facial recognition via a U.S.-based database. Screening becomes as easy as walk in, scan and go, results and data securely stored and accessible per specifications.

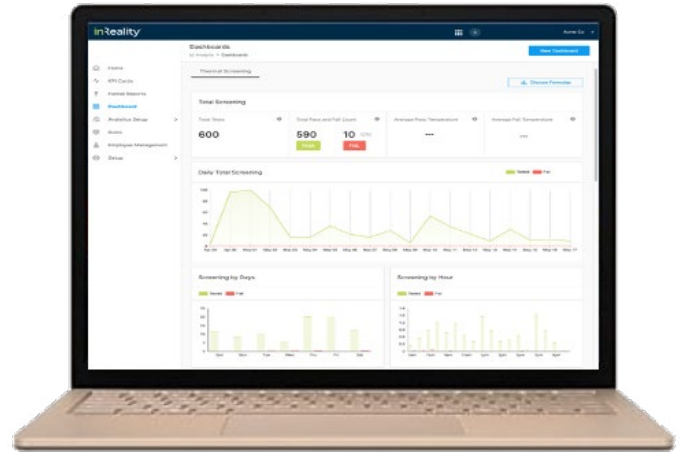

Anonymous

Define /customize settings for visitor instructions and audio or visual indicators. Step up for screening and results in less than a second. Option to scan an on-screen barcode to access results discreetly.

Manage metric gathering methods, tracking and reporting.

Enterprise Control

- ▶ Efficiently manage oversight with Smart Alerts
- ▶ No additional infrastructure or staff
- ▶ All you need is a browser, zero integration
- ▶ Define prompts, alerts, workflows & data storage to support HR & legal compliance
- ▶ Administrator dashboard tracks compliance, trends, historical anomalies and reports across all locations

Compliance? Check!

- ▶ Set data storage & privacy to support company or state requirements
- ▶ Set temperature thresholds and “smart alerts”
- ▶ Personalize the indicators, workflow & information displayed
- ▶ Access or download a full activity log
- ▶ Schedule automated reports

A tablet displaying the inReality 'People Management' interface. The interface shows a table of employees with columns for Name, Type, Venue, Screening Status, and Status. The table lists several employees, including Ryan Cahoy, Ron Lewec, Ron @InReality, Tony G, Laura T, Adam W, and Caylor S. Each row has a 'Screening Status' indicator (orange or green) and a 'Status' indicator (green or red).

Name	Type	Venue	Screening Status	Status
Ryan Cahoy	Employee	Kansas Office	Screening expired	Green
Ron Lewec	Employee	Wisconsin Office, Kansas Office	Screening expired	Green
Ron @InReality	Local Customer	Wisconsin State	Screening expired	Red
Tony G	Employee	Rosewell Office, MI, Any Office	Screening expired	Red
Laura T	Employee	Kansas Office	Screening expired	Red
Adam W	Employee		Screening expired	Red
Caylor S	Employee		Screening expired	Red

Temperature screening in only one step!

Enhance your safety protocols and speed up entry—incorporate our 3-step process to include Q&A screening and a time-stamped Safe Pass for use at all access points

1.
check

Take the Q&A Screening

2.
scan

Scan Temperature

3.
clear

Safe Pass for entry

Seeing is believing—ask your rep to see the demo.

Display Options

- Logo
- Thumbnail Shown
- Actual Temperature
- Known Visitor Name
- Red/Green Light
- Audio Prompts
- Audio Alerts
- Scan ID to start screening

Pass/Fail Message Details

Screening Pass Criteria

- Visitor Mode
- Mask Required

Temp Max Threshold: 100.4 | F

Device Settings

Temp compensation: -.75 | F

Volume Setting: [Slider]

Fahrenheit vs. Celsius: F

Accessories

- Scanner Enabled (Type)
- Printer Enabled
- Relay Enabled

Privacy Settings

Registered People

- Create an Event Log
- Log actual temperature
- Log Photo Thumbnail
- Log User's Name

Data Retention Duration: 1 | Days

Callout Boxes:

- Customize the display options to suit your administrator viewing preferences
- Choose to display known visitor name
- Direction and results indicators customizable by light, audio prompt & type of alerts
- Options for type of self identification and private results via app
- What indicates 'pass'? Are masks mandatory? Specifying the criteria is simple
- Ensure a smooth process with customized instructional prompts for pass/fail
- Certified accessories for ID scans, printers and relay needs support most workflows
- Administrators select data logging criteria for known, registered people to support compliance requirements
- Data retention duration is simple to specify and update

Standard or Enhanced?

Use this Software Comparison Tool to Choose

Feature/Functionality	Standard	Enhanced	Notes
Temperature scanning	✓	✓	
Supports over temperature notification on device	✓	✓	
Access to device(s) through a browser, for diagnostic and support uses	✓	✓	▶ Requires Internet/cellular connection for device
Software patches and updates	✓	✓	
Remotely configure and manage device settings and workflow	✓	✓	
Technical help/support services	✓	✓	
Ability to integrate with printer	✓	✓	▶ Hardware sold separately à la carte (printer, stand, sticker roll) + freight, taxes
Users (access/permission)	✓	✓	▶ Allows customer the capability to create and modify infinite user roles
Dashboarding (including pre-determined metrics)	✓	✓	▶ Allows customer the capability to create and modify infinite dashboards/users
Temperature scanning report	✓	✓	▶ View by date and venue ▶ Download as CSV file
All activities report	✓	✓	▶ Includes standard report (daily employee activity report)
Compliance reports	X	✓	▶ Create individual, departmental and venue-based compliance reports
Scheduled reports	X	✓	▶ Create daily, weekly or monthly of both activity and compliance reports ▶ Link automatically delivered via email
Alerting (real-time)	X	✓	▶ Allows customer the capability to create and modify custom alerts
People management	X	✓	▶ Allows customer the capability to create/set up/ manage employee, contractors, visitors, students and more ▶ Supports facial recognition, badge reading (additional hardware needed)
Ability to integrate with Q&A Screener	X	✓	▶ Q&A Screener hardware and software sold separately
